

LUBRICANTES - 5W30RN5L - LUBRICANTE SYNTETICO 5W30 RN C4

The experience gathered by Petronas on the F1 circuits and in the most important motoring events and competitions has enabled the development of Syntium: a range of hi-tech lubricants capable of meeting the needs of new-generation engines. Syntium 5000 RN is a Fully Synthetic lubricant with Fuel Economy characteristics, designed specifically for Renault engines with particulate filters.

CHARACTERISTICS

SYNTIUM 5000 RN thanks to low SAPS technology (Sulphated Ash, Phosphorus and Sulphur) can exceed ACEA C4 approval, offering:

- reduction of the accumulation of ash in the particulate filter capable of preventing regeneration and consequent falls in power;
- full compatibility with the requirements of the Renault particulate filters;
- advanced fuel economy characteristics combined with perfect maximising of engine performance;
- lengthening of the intervals between changes up to the maximum specified by manufacturers;
- reduction of oxidation and oil consumption.

Specification

SAE 5W-30

MB-Approval 229.51

RENAULT RN0720

MB-Approval 226.51

ACEA C4
